PROFESSIONAL SUMMARY

Full Stack Developer and Diploma Computer Engineering student with hands-on experience building SaaS platforms, business management systems, and web applications. Founder of TechDwar Technologies with experience delivering client projects and developing real-world software solutions. Skilled in React, PHP, JavaScript, Python, and MySQL, with a strong interest in scalable web development and automation. Winner of multiple hackathons and actively building production-ready applications.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), PHP, Python, Java, HTML5, CSS3, SQL, C, C++
Frontend	React.js, Responsive Design, UI/UX Design, Figma, Bootstrap, Tailwind CSS, DOM Manipulation
Backend / DB	PHP (Core), MySQL, REST API Integration, JSON, Node.js (Basic), Express.js (Basic), Dompok, Session Management
Tools	Git, GitHub, VS Code, Postman, Excel Import/Export, Google Sheets, Canva
Concepts	Full Stack Dev, SDLC, RBAC, Secure Auth, SQL Injection Prevention, Client Delivery, Agile

EXPERIENCE

Founder & Chief Growth & Technology Officer (CGTO) | TechDwar Technologies

Apr 2026 – Present

- Founded a tech startup delivering full stack web apps, business automation software, AI-powered solutions, and digital services to real-world clients across industries.
- Managed end-to-end SDLC — requirement gathering, UI/UX planning, development, testing, deployment, and post-launch support — ensuring on-time delivery and client satisfaction.
- Developed responsive websites, dashboard systems, and custom business applications using React, PHP, JavaScript, and MySQL; drove digital transformation improving client operational efficiency.
- Coordinated designers and developers, maintained branding consistency, and managed client relationships to drive retention and project success.

Frontend Developer | UI/UX & Digital Marketing Executive | Wavelength Enterprises

Oct 2025 – Mar 2026

- Revamped responsive UIs for 5+ client projects using modern design systems, reducing cross-platform inconsistencies by 40% and improving time-to-delivery.
- Managed digital ad campaign interfaces and collaborated with marketing teams to optimize CTA placement, layouts, and visual branding aligned with performance KPIs.

PROJECTS

Medicine Management Inventory System + AI Voice Assistant | JavaScript, Python, MySQL, AI API

Jan 2026 – Present

GitHub: divyanshuX72/MedSupplyAI

- Engineered real-time batch-wise medicine stock tracking with automated expiry and low-stock alerts, reducing manual inventory errors by ~60%.
- Integrated AI voice/chat assistant for natural-language inventory queries, cutting average operator lookup time by 50%.

Apna Dentist Management — Dental Clinic SaaS Platform | React, JavaScript, PHP, MySQL

Jan 2026 – Present

- Developed a comprehensive dental clinic management platform featuring patient registration, appointment scheduling, treatment records, billing management, and role-based dashboards.
- Implemented secure authentication, patient history tracking, appointment workflows, and real-time clinic operations management, improving operational efficiency.
- Designed responsive dashboards for doctors, receptionists, and administrators with centralized patient and treatment data management.

github.com/Hyper-A171/apna-dentist-management

PayNest Pro — College Payroll Management System | *PHP, MySQL, JavaScript, Dompdf*
github.com/divyanshuX72/PayNest-Pro

March 2025 – May 2025

- ▶ Built payroll automation with attendance-based salary calc, leave deductions, automated monthly generation, Dompdf PDF slip exports, and Excel bulk import/export.
- ▶ Enforced security via session management, bcrypt hashing, and SQL injection prevention with prepared statements; shipped real-time analytics dashboard.

AI Beach Safety & Discovery Web App — Smart India Hackathon 2025 | *JavaScript, Python, Geospatial APIs*
github.com/divyanshuX72/BlueHeaven-Beach-Guard-Smart-Beach-Safety-System

Sep 2025 – Present

- ▶ Built geospatial map search with real-time environmental API integration (wind, water, soil data), AI chatbot for safety guidance, and 360° virtual exploration.
- ▶ Delivered database-driven safety analytics dashboard with live news feed; project selected for Smart India Hackathon 2025 internal representation.

ACHIEVEMENTS & CERTIFICATIONS

- ▶ 1st Prize — HACK YOUR WAY Technocratz 2.0 | Agnel Polytechnic, Vashi (2026)
- ▶ 1st Prize — Gyantech Hackathon 2026 | Gyanodaya Degree College (2026)
- ▶ Finalist — GDG Mumbai AI Hackathon 2.0 | Google Developer Group Mumbai (2026)
- ▶ Internally Selected — Smart India Hackathon 2025 | Viva Institute of Technology (2025)
- ▶ Certified — Professional Program in Python Language | GUVI & IITM Pravartak Technologies Foundation (2026)

EDUCATION

Diploma in Computer Engineering
Viva Institute of Technology, Virar East

CGPA: 8.7 / 10
Expected 2027 | Sem 3
